Shows TypeEntity data type used in the [type-update](#) Ant task.

```
<type-update
  depot="${entity.depot}"
  resultproperty="rs"
  comment="Updating from ${ant.project.name} ant task."
  passfile="${ctl.base}/etc/framework.properties">
  <typeentity
    superclass="${context.type}"
    name="MyType"
    description="my special type"
  />
</type-update>
```
